Plugin Superscript

Use this wiki plugin to render characters as superscript text. It is the equivalent of using `<sup></sup>` tags in HTML.

Parameters

Apply superscript font to text
Introduced in Tiki 2.
Go to the source code
Preferences required: wikiplugin_sup

Parameters
(body of plugin) - text *no parameters*

Examples

Basic Example

This code:

```
This is regular text{SUP()}and this is superscript{SUP}
```

Produces:

This is regular font$^{\text{and this is superscript}}$

Example with Formatted Superscript

This code,

```
This is regular text{SUP()}''and this is italic superscript''{SUP}
```

Produces:

This is regular text$^{\textit{and this is italic superscript}}$
