

## Share

Introduced in [Tiki6](#), this feature allows sending messages to [Social Networks](#), as well as internal messages or forum posts to alert on some wiki page in your Tiki site, etc.

### How to use Share

#### Enable the Feature:

Admin home > Features > Global Features > Additional > Share

#### Admin Share

**To access:** Click the **Share** icon on the [Admin Panel](#)  
or access **<http://example.org/tiki-admin.php?page=share>**

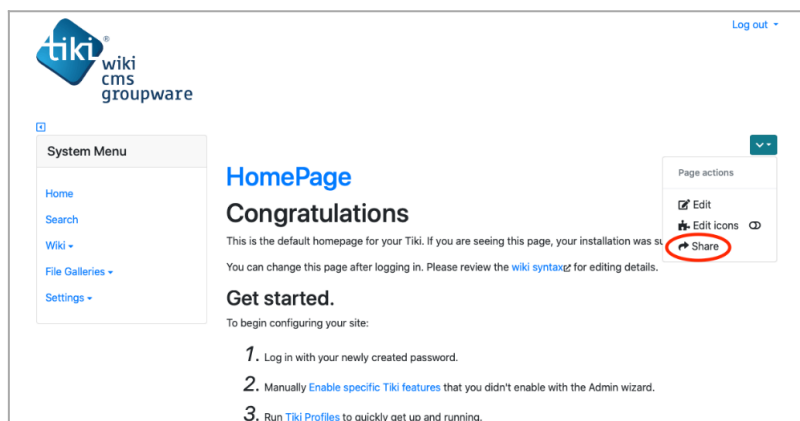

Set it up in the Share admin panel:

The screenshot shows the 'Share' configuration page in the Tiki Admin interface. At the top, there's a navigation bar with tabs for 'Advanced', 'Access', 'Content', 'System', and 'Tools'. Below this is a row of icons representing various features. The main heading is 'Share' with a subtext 'Configure share feature'. There's an 'Apply' button on the right. Under 'Activate the feature', the 'Share' checkbox is checked, accompanied by several small icons. The 'Site-wide features' section contains five settings, each with a checkbox and a link to 'advanced': 'Display links on the share page' (checked), 'Token notification' (unchecked), 'Add contact' (unchecked), 'Display name and email' (checked), and 'Number of times accessed' (unchecked). An 'Apply' button is at the bottom right.

Click to expand

Once enabled the feature, all pages will have a new icon on the top right corner, to allow the user to share this page with others:

Click to expand

Once you click there, you will be offered some options to share the page with, depending on the

associated features (internal or related to external social networks) which are already enabled and configured in your site.

Share with access rights

This feature is useful when sharing content that is not publicly available. The recipients will inherit user's access rights for the shared resource only.  
Preferences required: auth\_token\_access and auth\_token\_share.
