This is a stub. And needs review

This is how a user will see a MobileTiki enabled site through the computer web browser:

This same page, in the mobile version, will look much simpler, using either small fonts:

1. To develop from Tiki CMS/Groupware & HAWHAW an easy tool for any webmaster to generate a website accessible to visually impaired (blind) people, cellular phones, PDAs, Lynx text browsers and VoiceXML applications.
2. To develop a community around this objective, including of course visually challenged users.
