Backlinks

About Backlink Feature

Backlinks are very important features in wikis. They answer the question "What links here?". Backlinks appear at the top right of wiki pages.

If a page is renamed, Tiki automatically updates all of its backlinks.

Use the \texttt{tiki_p_view_backlink} permission to allow or restrict who can view a page's backlinks.

 Activate Backlinks feature via Admin Wiki page.

Backlinks are a Wiki feature that can be enabled on the \texttt{Features} tab of the Admin Wiki page.

1. From the Admin Features page, click the \texttt{Wiki} icon
2. From the Admin Wiki page, click the \texttt{Features} tab.
   (image missing)
3. Click \texttt{Change Preferences}.

To set the necessary \texttt{permission} for this feature, click the Key icon.

\textbf{NOTE:} If you are having trouble with backlinks showing up, try clearing the \texttt{cache} and checking the group \texttt{permissions} for this feature.

Activate Backlinks feature via Plugin

It can also be done with \texttt{PluginBacklinks} so you can put anywhere.
