Edit Templates

Related: Edit CSS

Pre requisites:

The feature must be enabled through:
Look and Feel -> Theme - > tick edit templates then apply.
(once this is done you will see "Edit templates" in your Admin menu)

The user must have the tiki_p_edit_templates permission.

Feature:

Edit Template is a feature to let you edit the Smarty template files (.tpl) of your theme via the web interface.

It is also possible to let users view templates without editing

Old doc:
http://tikiwiki.org/CssEditDev

Registered users can try here:
http://themes.tiki.org/tiki-edit_css.php

Troubleshooting

**Error** - When attempting to enable the Edit Templates feature you encounter a 404 page with the error You don't have permission to access tiki-edit_templates.php on this server

**Possible Explanation** - Some shared hosting companies have built-in security that prevents certain files from being executed. If you received an error similar to this when installing TikiWiki the same solution likely applies.

**Solution** - Contact your host and have them 'whitelist' or allow the file tiki-edit_css.php to be executed.
