Plugin Invite

Introduced in Tiki4

Use this wiki plugin to invite an already existing user or a new user to one or more of the requesting user's groups.

The groups will be limited to the groups the user is in. A user with his email as his login will be created if the user does not exist. Otherwise if a user with this email will be used. An email will be sent to this user with a link to activate his account for a new user (activation like the email 'refresher') - A simple email will be sent if the user already exists.

Prerequisites and limitations

The user must have the perm tiki_p_invite to use this plugin.

In intertiki, the user is locally created.

Parameters

Introduced in Tiki 4.
Preferences required: wikiplugin_invite, feature_invite

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
<th>Default</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td>(body of plugin)</td>
<td></td>
<td>Confirmation message after posting form</td>
<td></td>
<td></td>
</tr>
<tr>
<td>defaultgroup</td>
<td>groupname</td>
<td>Dropdown list will show this group by default</td>
<td>4.0</td>
<td></td>
</tr>
<tr>
<td>including</td>
<td>groupname</td>
<td>Will list only the groups that include this group</td>
<td>4.0</td>
<td></td>
</tr>
<tr>
<td>itemId</td>
<td>text</td>
<td>Dropdown list will show the group related to this item ID (in group selector or creator field) by default</td>
<td>4.0</td>
<td></td>
</tr>
</tbody>
</table>

Example

Basic syntax

```
{INVITE(including="Registered|Editors" defaultgroup="Registered")}Invite Sent!{INVITE}
```
