**Example**

*This code:*

```
{TABS(name="user_tabset_01" tabs="Title 1|Title 2|Title3"))This is the content of the first tab
/////
This is the content of the second tab
/////
This is the content of the third tab
{TABS}
```

*Would produce:*

This is the content of the first tab

This is the content of the second tab
This is the content of the third tab

When clicking on a tab name, the content of each tab is loaded and shown without refreshing the browser window.

And when clicking on the "No Tabs" option, the display would change into:
