Plugin TrackerToggle

Introduced in Tiki 7

This wiki plugin utilizes jQuery to toggle the visibility of an HTML element (like a div) depending on the value of a field. This plugin can be used in Pretty trackers. This plugin permits Display logic.

Parameters

Introduced in Tiki 7. Required parameters are in bold.
Preferences required: wikiplugin_trackertoggle, feature_jquery, feature_trackers

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
<th>Default</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td>id</td>
<td>text</td>
<td>HTML id of the element that is toggled</td>
<td></td>
<td>7.0</td>
</tr>
<tr>
<td>value</td>
<td>text</td>
<td>Value to compare against.</td>
<td></td>
<td>7.0</td>
</tr>
<tr>
<td>fieldId</td>
<td>digits</td>
<td>Numeric value representing the field ID tested.</td>
<td></td>
<td>7.0</td>
</tr>
<tr>
<td>visible</td>
<td>(blank) y n</td>
<td>Set whether visible when the field has the value.</td>
<td>n</td>
<td>7.0</td>
</tr>
<tr>
<td>itemId</td>
<td>digits</td>
<td>Use the field of specific item. The URL param itemId is used if this parameter is not set.</td>
<td>0</td>
<td>7.0</td>
</tr>
</tbody>
</table>

Note

- Category needs categId not categName to match
- If you use a field more than once in a template (e.g., \{$f_180\} ) only the first one on the page will be functional
- Only one plugin TRACKER of the same trackerId may appear on the page
- Only fields with a text value or checkbox (y/n) are functional prior to Tiki 11

Examples

Radio buttons

This code will show the div success only if the field 206 has the value "Show". When the field is not set yet, the div is not displayed.

```{DIV(id="success")]Congratulations! The "success" div now shows.{DIV}
{trackertoggle fieldId="206" value="Show" visible="y" id="success"}
{$f_206}
```

Result:
Show only if checkbox is checked
This code will show the div 'checkbox' only if the checkbox is checked. When the box is not checked, the div is not shown.

```html
{DIV(id="checkbox")}The checkbox div{DIV}
{trackertoggle fieldId="180" value="y" visible="y" id="checkbox"}
Checkbox: {$f_180}
```

Show unless checkbox is checked
Will show the div until the checkbox is checked.

```html
{DIV(id="checkbox")}The checkbox div{DIV}
{trackertoggle fieldId="180" value="y" visible="n" id="checkbox"}
Checkbox: {$f_180}
```
