Tiki22

Tiki 22.0 was released in November 2020 (slightly delayed as it was planned for October; development started in February 2020).

It is a Standard Term Support (STS) version and will be supported until Tiki 23.1 is released as per the Tiki lifecycle policy.

As a post-LTS version, this one typically has more changes than usual. However, as of 2019-11-26, there are no major changes like the move from Bootstrap 3 to Bootstrap 4.

Requirements are now PHP 7.4 vs 7.2 in Tiki21.

See what is planned: Tiki22

Table of contents

- 1.1. Check
- 1.2. Mail-in
  - 1.2.1. Mail-in to files
  - 1.2.2. Mail-in to trackers
- 1.3. Mail Notifications
- 1.4. Numeric field data modification via mouse scroll can be disabled or enabled
- 1.5. Shared Secrets
- 1.6. Trackers
  - 1.6.1. Duration field type
  - 1.6.2. Search orphaned field names
  - 1.6.3. Exclude indexing non-searchable tracker fields
  - 1.6.4. Shorten tracker field names in mysql search index to allow greater number of fields in the index
  - 1.6.5. Group can see their own items
- 1.7. Wiki Plugins
  - 1.7.1. PluginListExecute
  - 1.7.2. PluginList editable filters
  - 1.7.3. PluginPivotTable
  - 1.7.4. PluginTOTP
- 1.8. Suggestions
- 1.9. Risky Preferences
- 1.10. Unified Index
  - Now supports emails which are stored as files
- 1.11. Vue.js
- 1.12. Webmail contacts
- Removals
  - ZendSearch

(alphabetically sorted)
1.1. Check
   - tiki-check database tables/columns mismatches

1.2. Mail-in
1.2.1. Mail-in to files
   Mail-In to Files - save email as message/rfc822 file in a file gallery - include raw content and all headers
   http://sourceforge.net/p/tikiwiki/code/75496

1.2.2. Mail-in to trackers
   - Mail-in
   - https://sourceforge.net/p/tikiwiki/code/76806

1.3. Mail Notifications
   Add catch-all/redirect mail delivery option for SMTP messages - useful when debugging or testing upgrades
to have all Tiki mail delivered to a single mailbox
   https://sourceforge.net/p/tikiwiki/code/75843

1.4. Numeric field data modification via mouse scroll can be disabled or enabled
   Browsers have different behaviors which causes support issues. Harmonizing behavior by default while permitting previous behavior: https://sourceforge.net/p/tikiwiki/code/75930

1.5. Shared Secrets
   - Shared Secrets

1.6. Trackers
1.6.1. Duration field type
   - New Duration Tracker field

1.6.2. Search orphaned field names
   tiki-admin_orphaned.php
   https://sourceforge.net/p/tikiwiki/code/76278/

1.6.3. Exclude indexing non-searchable tracker fields
   https://sourceforge.net/p/tikiwiki/code/76278/
1.6.4. Shorten tracker field names in mysql search index to allow greater number of fields in the index

https://sourceforge.net/p/tikiwiki/code/76303/

1.6.5. Group can see their own items

add options for ‘Group can see their own items’ and group ownership to GroupSelector fields - enhance permission system to support ability for users in specific group to view items associated with that group

https://sourceforge.net/p/tikiwiki/code/76003/

1.7. Wiki Plugins

New, improved or Fixes

1.7.1. PluginListExecute

PluginListExecute

Improved. New action tracker_item_clone has been added. This gives the ability to clone one or more selected tracker items and execute more actions on the clones after that - e.g. tracker_item_modify

https://gitlab.com/tikiwiki/tiki/-/commit/ea6f50574b0dc8e19fc5a5dd979686a0c10d872f

Fix. Allow checkbox value to be reset with tracker_item_modify ListExecute action.

https://gitlab.com/tikiwiki/tiki/-/commit/43e10f9d51baae9a4174e254973dd4ad8ab2e987

Fix. cloning tracker items via ListExecute keeps auto-assigned UserSelector values instead of resetting that to none or current user

https://gitlab.com/tikiwiki/tiki/-/commit/bec107dd655c236dc31abfc12c3a9bfdddb2d4a13

1.7.2. PluginList editable filters

Improved. See: PluginList with editable filters

1.7.3. PluginPivotTable

Column/Row sort order are now savable

https://sourceforge.net/p/tikiwiki/code/76955/

1.7.4. PluginTOTP

- PluginTOTP

1.8. Suggestions

Suggestion

1.9. Risky Preferences

Some risky preferences are disabled and hidden by default, since Tiki 22
1.10. Unified Index
Now supports emails which are stored as files

Commit: 75563 - added a preference in search index and file gallery which is off by default - Automatic indexing of emails stored as files
- when you turn it on, rfc822 files (aka eml files) will be parsed and stored as separate fields in the search index. For now, these fields are stored:

- email_subject
- email_from
- email_sender
- email_recipient
- email_date
- email_content_type
- email_body
- email_plaintext
- email_html

1.11. Vue.js
VueJS In Tiki

1.12. Webmail contacts
- add read-write access to webmail contacts via CardDAV and refactor underlying backend

https://sourceforge.net/p/tikiwiki/code/76499

Removals
ZendSearch

https://github.com/zendframework/ZendSearch/pull/23#issuecomment-312265313
