Web Monetization

Web Monetization feature is the most popular way of monetizing your Tiki Site; It allows online content creators to monetize their content.

Prerequisites

- Create Your Coil Account

As the very first step, you need to sign up to Coil. Go to the Coil website and go through the signup process.

- Get Your Payment Pointer

The next thing you need is a payment pointer. This will tell Coil where to send the donations that are coming in from Coil subscribers visiting your Tiki site.

You can easily set up your payment pointer from the settings panel in your profile on the Coil website. Simply navigate to the settings page and click on the "Payout" tab.

You will find an overview of different payout options including setup options to follow. If you want to receive your payments in XRP, then I can recommend the XRP Tip Bot option. If you prefer a payout in USD, you have to go with the option offered by Stronghold, which is a cryptocurrency exchange.

The payment pointer is not confidential and bears no security risks, so don’t worry about hiding it.

You need to add your payment pointer to your Tiki Site. For that, go into your Tiki control Panels > Payment > Web Monetization.
