

Funcionalitats de TikiWiki

TikiWiki és un del sistemes de gestió de contingut (SGC) més plens de funcionalitats del món. A diferència d'altres projectes de codi obert que inclouen només un petit conjunt de característiques i animen a instal·lar-se [extensions](#) de 3rs llocs, la comunitat del Tiki ha escollit incloure el màxim nombre de funcionalitats possibles en el dipòsit central de codi CVS. Això ajuda a que, a diferència d'altres projectes, quan fas una actualització, les teves característiques no quedaran trencades. Tanmateix, no totes les característiques són igual de plenament desenvolupades, així que aquesta pàgina proporciona una puntuació de les funcionalitats ajudan-te a valorar si Tikiwiki és adequat per a tu.

Notes generals: sobre les funcionalitats de Tikiwiki

Tiki Wiki CMS Groupware (  Tiki  ) ofereix un n mero molt gran de caracter stiques funcionals en quedar feta la instal laci  base, raonablement m s que qualsevol altre aplicaci  Web de codi obert.  s tan ple de funcionalitats que pot ser aclaparador, fins i tot per a un usuari experimentat o administrador. Tiki t  tot el cl ssic de funcionalitats d'un portal SGC, per  tamb  t  algunes que encara no s n disponibles en altres aplicacions similars. Altament configurable i modular, totes les caracter stiques s n opcionals i  s administrat via un interf cie basada en web. El que fa a Tiki tan potent  s la integraci  tan ben enlla ada de totes les funcionalitats.

Tiki  s un projecte molt actiu. En mitjana, hi ha una contribuci  al codi (una correcci  d'un error, una caracter stica nova, etc) [cada 2 hores](#). Aix  que, amb el temps, les caracter stiques esdevenen millors.  s un projecte de codi obert aix  que tamb  tu pots participar a fer-lo millor!

Al voltant de [170 persones han contribu t al codi font](#). Algunes caracter stiques s n  mpliament i molt estables mentre altres ja no s n mantingues o tenen errors. La auto-avaluaci  pr via t'ajudar  a saber qu  esperar. Totes caracter stiques s n opcionals, aix  que pots triar i escollir el que necessites pel teu projecte. Si ets principiant, aferrat a caracter stiques que han estat avaluades majorit riament com a As i Bs.

Per millorar la llista, si us plau, connecta't i punxa en el nom de la caracter stica. Si us plau, omple la informaci  pendent i corregeix el que sents que  s incorrecte. I sents que la caracter stica X mereix una B en comptes d'una D, endavant, si us plau! (Tots els canvis seran revisats per un administrador del projecte, i revertits, si cal.) Tamb  pots afegir comentaris. Per exemple: "crec aquesta caracter stica mereixer  un "B" quan aquesta opci  sigui oferta"

Si vols informar d'un error o suggerir una millora d'una funcionalitat, empra, si us plau emprar el nostre [formulari d'errors i llista de peticions](#). Les funcionalitats i puntuacions pr vies es basen en la darrera vers o estable de Tiki (1.9.7 actualment). De totes formes, encara no totes les funcionalitats existents han estat afegides. Encara manquen moltes extensions (plugins), per exemple.
