- Theme Generator

To Access

From the Look and Feel Admin page, click the **Pagination Links** tab.

Option	Description	Default
Custom CSS	Additional CSS rules can be entered here and will apply to all pages, or the CSS ID of a page can be used to limit the scope of the rule (check the HTML source of the particular page to find its body ID tag.)	None
Custom HTML head content	Additional content such at meta or link tags can be added to the head section of HTML files. Smarty filters can be used here. *Example: {if $page eq 'Slideshow'}{literal}yle type="text/css">.slideshow { height: 232px; width: 232px; }{/literal}{/if}*	None
Custom code just before the closing </body> tag	Enter lines here to be placed near the end of the HTML file.	None
Google Analytics account number	The account number for the site. The account number from Google is something like UA-XXXXXXX-YY. *Enter only XXXXXXX-YY (without the UA)*	None
Custom JavaScript	Includes a block of inline JavaScript after the inclusion of jQuery and other JavaScript libs in all pages. *Use PluginJS to include Javascript on a single wiki page.* *Do not include the < script > tags.*	None
Add group CSS info	Either grp_Anonymous or grp_Registered and possibly grp_Admins as well *Add CSS classes to the page BODY tag based on the user's group membership*	Disabled
Categories to add as CSS classes to <body>	Pages in selected categories will have a class with syntax like "cat_catname" added to the body tag.	None
Theme Customizer tool	Activate the theme customizer tool to enable easy theme customization.	Disabled
Edit CSS	Edit CSS files directly in the browser. *May not be functional in Tiki 14+*	Disabled
Tiki template viewing	*May not be functional in Tiki 14+*	Disabled

Option	Description	Default
Edit templates	*May not be functional in Tiki 14+*	Disabled
Editable Icons	Edit icons with the icon picker No | Yes	No

Option	Description	Default
