Use this Content Templates in any feature page as per the Tiki Manual of Style

Feature Name

-

- Use Heading 2 for the Feature Name. (Because we don't add the page titles automatically).
- Describe what the feature is for in 100-200 words. Give a couple of examples how the feature would be used.
- Include a half page size (about 300 pixels wide) cropped image of the feature in action.
- backlink to index related pages, related features, general concepts etc. Don't use a bulleted list here because it takes up too much vertical space.

Using Multiple Pages to Document a Feature
If multiple pages are used to document a feature, list them here with a brief explanation. Use plain language to name additional pages.
((Create a Feature))
((Configure a Feature))
((Add Permissions to a Feature))

How to use Feature

-
Enable the Feature: (explain how to find this feature's admin panel with both breadcrumbs and a direct local url)
Administration~~>Feature~~>Page **local url**:yoursite.com/url

Explaining the "Create" Form

Create a table which explains the form that is used to create the instance of the feature.

Option	Choices You have	Default Behavior	What this does in plain language
Turn on Dinger?	Yes,No	No	Turns on a noisy dinger that dings when you ping
exact text from form	acceptable values,comma separated	what happens if you choose not to choose	what difference it makes
Dinger Name	alphanumeric	required field	You have to give the dinger a name.

Modify/Customize the instance

(explain how to find this feature's admin panel with both breadcrumbs and a direct local url)

Administration~~>Feature~~>Page **local url**:yoursite.com/url

Explaining the next form

Create a table which explains the form or options that customize the instance.

Option	Choices You have	Default Behavior	What this does in plain language
Turn on Dinger?	Yes,No	No	Turns on a noisy dinger that dings when you ping

exact text from form	acceptable values,comma separated	what happens if you choose not to choose	what difference it makes
Dinger Name	alphanumeric	required field	You have to give the dinger a name.

Permissions

Explain what permissions can be applied to the feature and what they mean.
