Google Maps Admin

Google Maps icon

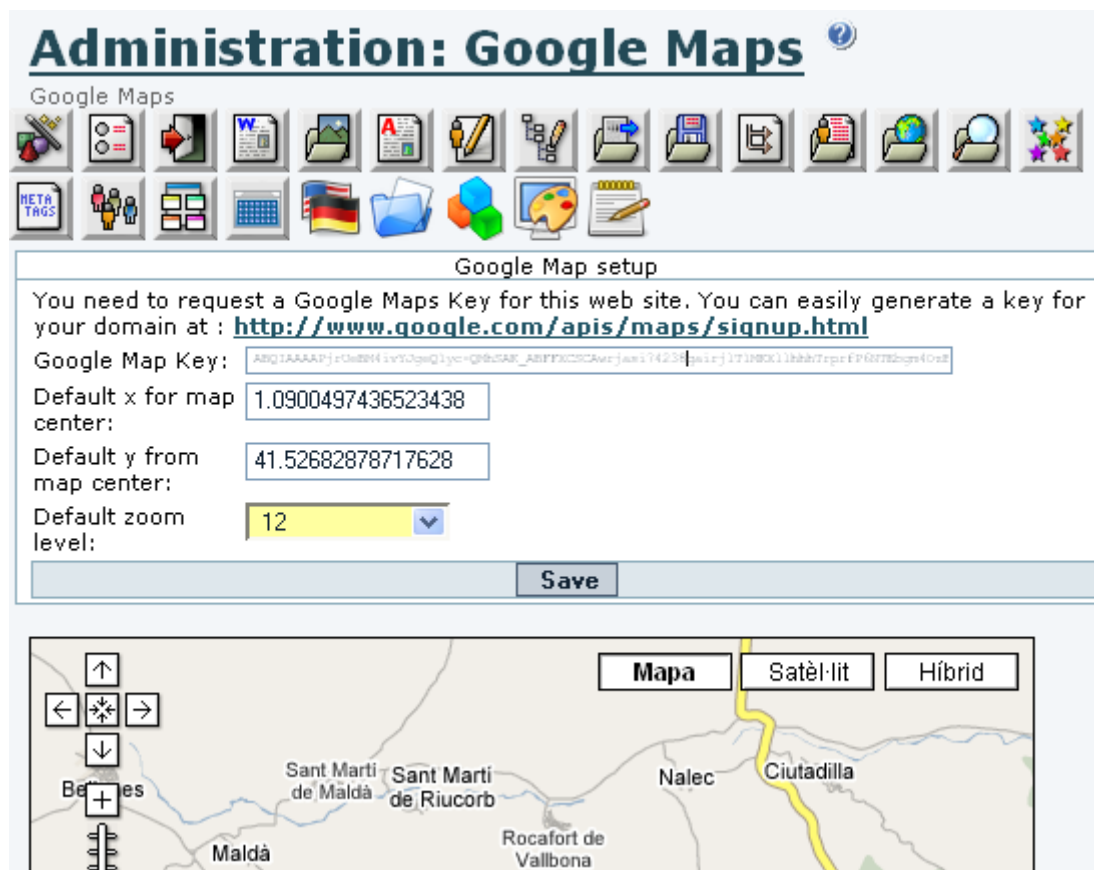

[Google Map](#) feature can be enabled through "**Admin home > Features > Google Map**".

It can be initially set up for the whole Tiki through "**Admin home > Google Maps**" (**tiki-admin.php?page=gmap**).

First time, it will recognize that you don't have any Google Map key for your specific web site domain (required), and it will suggest you to request one at:

<http://www.google.com/apis/maps/signup.html>

Once you complete the process in the Google site side, you can come copy the generated key to the corresponding field in **tiki-admin.php?page=gmap**. Once done, you will be able to see your map below, like this:

The screenshot shows the 'Administration: Google Maps' interface. At the top, there's a title bar with a question mark icon. Below it is a row of various application icons. The main section is titled 'Google Map setup' and contains instructions: 'You need to request a Google Maps Key for this web site. You can easily generate a key for your domain at : <http://www.google.com/apis/maps/signup.html>'. Below this, there are input fields for 'Google Map Key:' (containing a long alphanumeric string), 'Default x for map center:' (1.0900497436523438), 'Default y from map center:' (41.52682878717628), and 'Default zoom level:' (12). A 'Save' button is at the bottom of the form. Below the form is a map preview showing a region with labels like 'Maldà', 'Sant Martí de Riucorb', 'Nalec', and 'Ciutadilla'. Map controls (direction arrows, zoom in/out, etc.) are on the left, and map style buttons ('Mapa', 'Satèl·lit', 'Híbrid') are on the right.
