Plugin Fancy List

Use this wiki plugin, introduced in Tiki3, to produce a fancy looking numbered list.

Parameters

Create a formatted numbered list
Introduced in Tiki 3.
Go to the source code
Preferences required: wikiplugin_fancylist

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		One item per line starting with anything followed by ")".		
`class`	text	CSS class for the fancylist		3.0
`div`	(blank) 1 0	Use the HTML div tag instead of the HTML ordered list tag (ol)		3.0

Example

In this example, additional formatting is applied to the items in the list: the double single quotes ('') to produce italics, and the two underscores before and after the words (__) to make the font bold. See Wiki Syntax for more information on text formatting.

This code,

```
{FANCYLIST()} ''__Antiquity__'' ''__Middle Ages__'' ''__Renaissance__'' ''__Age of Enlightenment__''
''__Romantic Era__'' ''__20th Century__'' ''__Present Day__'' {FANCYLIST}
```

Would produce:

1. ***Antiquity***
2. ***Middle Ages***
3. ***Renaissance***
4. ***Age of Enlightenment***
5. ***Romantic Era***
6. ***20th Century***
7. ***Present Day***
