

This experimental feature was removed before [Tiki19](#) because

- it was not really working
- no one was working to improve it
- and it duplicated existing functionality
 - [PluginTrackerList](#) for simple reports
 - [PluginList](#) for advanced reports

Details: <https://tiki.org/forumthread67333-Let-s-remove-unmaintained-PluginReport>

Plugin Report

Introduced in [Tiki9](#), use this [wiki plugin](#) to build a [Report](#), store it in a wiki page, and edit it from the page itself.

Parameters

Plugin Manager error: report plugin not found

Examples

Example of code to use for a report, generated from the edit report interface:
