Wiki Plugin WMV

Description

This plugin plays a Windows Media Player movie in a wiki page (.wmv)

Usage

Copy attachment to:

```
lib/wiki-plugins/
```

WMV Displays a Windows Media Player Movie on the wiki page:

```
{WMV(width=>xx,height=>xx, controller=>true|false,autostart=>1|0)}Movie{WMV}
```

with and **height** optional (default 320 x 240)
controller optional (default true) 16 pix are added to height to show up the contoller
autostart optional (default false)

alternative you could write

```
{WMV(movie=>URL to Movie, width=>xx,height=>xx,
controller=>true|false,autoplay=>1|0)}{WMV}
```

Example

```
{WMV()}http://yoursite.org/pub/sample.wmv{WMV}
```

Link .wmv file in file galleries

You can link .wmv files in file galleries as a plugin in wiki page by using the files' id in file galleries.

First you have to edit the wikiplugin_wmv.php

Add "tiki-download_file.php?fileId=" in this line in wikiplugin_wmv.php

```
$asetup .= "<param name=\"Filename\" value=\"$movie\"> ";
```

change to

```
$asetup .= "<param name=\"Filename\" value=\"tiki-download_file.php?fileId=$movie\"> ";
```

After that you just need to enter fileid of the wmv file instead of file's url

```
{WMV(movie=>fileid, width=>xx,height=>xx,
controller=>true|false,autoplay=>true|false,loop=>false|true)}{WMV}
```

- Remember to change back the code if you want to link to file by using url or you can just create another new plugin.

Download

You can download it from the attachment to http://tikiwiki.org/PluginWMV, and copy it to copy to **lib/wiki-plugins**.
