

Overview

Use this tab to specify a Tiki repository URL and data channel

Related Topics

- [Tiki Profiles](#)

To Access

From the [Profiles Admin](#) page, click the **Advanced** tab.

Option	Description	Default
Automatically approve wiki-plugins on pages installed by profiles	Some wiki-plugins require admin approval before they are executable. If turned on, then all wiki-plugins that are on wiki pages created via profiles are automatically approved. ▲ Make sure your profiles are not executable or editable by untrusted users.	Disabled
Developer mode	For profiles under an approval workflow, always use the latest version, even if not approved. ▲ Make sure you review the profiles you install.	Disabled
Repository URLs	List of URLs for the profile repositories that will be used <i>Enter multiple repository URLs, one per line.</i>	http://profiles.tiki.org/pr...
Data channels	Data channels are templates that can be applied from a post request. They can be used to automate work on more complex installations. <i>Data channels create a named pipe to run profiles from user space. One channel per line. Each line is comma delimited and contains channel name, domain, profile, allowed groups, (optional) \$profilerequest:input\$ matches to groups.</i> ▲ There are security considerations related to using data channels. Make sure the profile page is controlled by administrators only.	None
