Friendship Network

- Friend's PluginActivityStream on the Friendship Network page (requires some configuration)
- Friend List module can be used anywhere to manage friends or followers
- **Internal:** Functionality exposed as services to allow lightweight integration into other features

General Description

The Friendship Network is a system where we may ask our fellow Tiki users to be part of our direct contacts. Helping to create a connected community.

Key Function and sub-features

Allows members to request communication. If the request is answered then you will be added to the persons "Friends" list.

- A new menu "Community" is created, with the correct perms this allows you to see the member list.
- A sub menu "Friendship Network" takes you to your friend list.
- Posts by your friends will have a friend icon
- At the users profile there is a "This user is your friend" note.

Typical Uses

This could be used in a large community to help get people connected.
Used in conjunction with the trackers this could be a powerful way for people to connect.

- Arranging events
- Finding friends

When invited into a user's network, you will receive a Tiki Message (in your MyAccount) area, similar to the following:

> From: Webkeeper To: jamesoftopiya Cc: Subject: You're invited to join my network of friends! Date: Mon 09 of Aug, 2004 Go to your friendship network to accept or refuse this request
