

# Directory Img-Custom Files

All of the icon files shown in the following image are located in the **img/custom** directory.

These files can be displayed with the following syntax:  
**{img src=img/custom/NAME}** where NAME is the name of the file.

**Note:** Punctuation is important! The difference between `Img` and `img` may seem minor - but - the difference is  
**File Not Found**
