

Module calendar_new

Introduced in version 3.0

This [Module](#) adds a small calendar that allows to see the events of the current month, basic data in the calendar box, and the other info on a hover box while passing the mouse over.

PARAMETERS

Includes a calendar or a list of calendar events.

[Go to the source code](#)

Preferences required: feature_calendar

Parameters

Accepted Values

calIds

Description

If set to a list of calendar identifiers, restricts the events to those in the identified calendars. Identifiers are separated by vertical bars ("|"), commas (",") or colons (":"). Example values: "13", "4,7", "31:49". Not set by default.

Default	Since

month_delta	int
-------------	-----

viewmode	word
----------	------

linkall	word
---------	------

showaction	word
------------	------

Distance in month to the month to display. A distance of -1 would display the previous month. Setting this option implies a calendar view type with a month time span.

Example values: 2, 0, -2, -12.

If in calendar (or "table") view type, determines the time span displayed by the calendar. Possible values: year, semester, quarter, month, week, day. A user changing this time span in the calendar can change the time span the module displays for him.

y|n

y|n

month

week

USAGE

The assigned module looks like this:

CALENDAR

March

S	M	T	W	T	F	S
01	02	03	04	05	06	07
08	09	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31	01	02	03	04

10:29 > 10:29

- SESSIÓ FTIC, 17:30 CEST - 20:30 CEST

If you change the main Tiki [calendar](#) view (for example, semester mode), the calendar module will be updated accordingly.

You can specify if you want to see the events in a popup for each day. The calendars are specified in the params box of
admin->modules
callds[]=1&callds[]=2

To see the calendar 1 and the calendar 2

Be careful: permissions are not checked on the calendar
