Intertiki

Status
● Open

Name
Intertiki

Feature name and link
Intertiki

Description
Authenticate users and grant them appropriate permissions at a "slave" Tiki site based on user data from an external "master" Tiki site. (This is used at the Tiki project sites, for example.)

Notes
UI end user: A->C: there is no information on tiki-login_scr.php or similar when intertiki is activated, and users can login with @domain info in their usernames. Plus sometimes, it doesn't show modules for users logged as intertiki users (as it happened in edu.tw.o)
