

# Breadcrumb

There are two feature with this name.

1. Breadcrumb in [Site Identity](#) which is to add a hierarchy of where you are. Ex.: Home > Section1 > Subsection C. ~~This feature is neglected and may be removed from Tiki in the future.~~ This feature is now functional in Tiki 9.1
2. [Module Breadcrumb](#), which shows you the list of recently visited pages.

# Alias

- [Breadcrumbs](#)
