Apply Profiles tab

Overview
Use this tab to select an apply a profile from a repository to your Tiki.

To Access
From the Profiles Admin page, click the Apply Profiles tab.

Note
Starting in Tiki3 the profile system is a powerful and versatile system that can be managed by the Tiki community. See http://profiles.tiki.org.
Profiles give the installer a choice of partially configured sites to install. They give a head start on the configuration process by picking a type of site that is similar in purpose.
Starting in version 2.x (as a hidden feature) and specially after 3.x, you can point your browser to `tiki-admin.php?page=profiles` ("Admin home > Profiles"), allowing to set up at any time bunches of features in a certain way to produce specific use case of interest.

New Tiki 2.x and 3.x profile system

---

Invalid YouTube URL provided

Old profile system (< Tiki 2.x)

In Tiki 1.9, profiles were only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.

---

**Tiki installer v1.9.7**

[reload]

*Welcome to the installation & upgrade script!*

---

**Install**

Create database (clean install) with profile:

- Default installation profile
- Default installation profile
- Default installation profile

---

**Requirements**

Your php must have the option `allow_url_fopen` On or must have the library `curl` installed. Javascript must also be enabled on your browser

**Details of Supported Profiles**

**Tiki 3.x**

See [http://profiles.tiki.org](http://profiles.tiki.org)

Starting in version 2.x (as a hidden feature) and specially after 3.x, you can point your browser to `tiki-admin.php?page=profiles` ("Admin home > Profiles"), allowing to set up at any time bunches of features in a certain way to produce specific use case of interest.

Tiki 3.x

See http://profiles.tiki.org

"Profiles" up to Tiki 1.9.x was a feature used only when you install Tikiwiki. It set up the Tikiwiki according to an existing configuration that was "saved" from another site. Until version 2.x, this feature is only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.
