Plugin Subscript

Use this wiki plugin to render characters as subscript text (slightly below the regular line of text and smaller). It is the equivalent of using `<sub></sub>` tags in HTML.

Parameters

There are no parameters required - only the text between the `SUB` tags is needed.

Examples

Basic Example

This code, `This is regular text{SUB}and this is subscript text{SUB}` Produces: `This is regular font and this is subscript`

Example with Formatted Subscript

This code, `This is regular text{SUB}''and this is italic subscript''{SUB}` Produces: `This is regular text and this is italic subscript`
