Repair Database

Tiki needs a database to work correctly. If you get an error like table crashed (or similar), perhaps you need to fix this and Tiki will work as expected.

### Example error

Table 'tiki_sessions' is marked as crashed and should be repaired

Please see some instructions

- [http://kb.siteground.com/article/How_to_repair_a_MySQL_database.html](http://kb.siteground.com/article/How_to_repair_a_MySQL_database.html)
- [http://www.google.com/search?q=How+to+repair+a+MySQL+database](http://www.google.com/search?q=How+to+repair+a+MySQL+database)

### Actual SQL query

```
REPAIR TABLE `tiki_sessions`;
```

To avoid the trouble you can also install Tiki with (or convert later) your MySQL tables to InnoDB format (instead of default MyISAM).
