Plugin Versions

Use this Wiki Plugin to divide a wiki page into separate "versions." Tiki will display a navigation box that allows users to display each version of the page. For example, you can use this plugin to separate a single wiki page into Release 1, Release 2, and Release 3 information.

Parameters

*Introduced in Tiki 1.*

*Preferences required: wikiplugin Versions*

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(body of plugin)</td>
<td>Block of text separated by -(version x)- markers. Text before the first marker is used by default.</td>
<td></td>
</tr>
<tr>
<td>default</td>
<td>Specifies version label to show when displaying the page for the first time. Default label is 'Default'</td>
<td></td>
</tr>
<tr>
<td>nav</td>
<td>(blank)</td>
<td>Display a navigation box that allows users to select a specific version to display.</td>
</tr>
<tr>
<td>title</td>
<td>(blank)</td>
<td>Display the current version name as the title. No title shows when nav=&quot;y&quot;; otherwise shows by default.</td>
</tr>
</tbody>
</table>

Notes

- If you use Wiki Config wiki page caching, this plugin may not render properly.
- The "versions" used for this plugin are different than the "versions" stored in the wiki page history.

Examples

To separate different versions of text use: 3 dashes (hyphens), followed by the version label in parenthesis, followed by at least 3 other dashes or hyphens. For example:

---(version 3)------------------------

Basic example

*This code:*

```
{VERSIONS(nav="y" title="y")}
```

This is the default text
This is version 3 info

This is version 2 info

This is version 1 info

{VERSIONS}

Would produce:

This is the default text

More Examples

This code:

{VERSIONS(nav="n")}
This is the default text
---(version 3)-----------------------------
This is version 3 info
---(version 2)-----------------------------
This is version 2 info
---(version 1)-----------------------------
This is version 1 info
{VERSIONS}

Would produce:

Default
This is the default text

Sample usage in conjunction with PluginTracker and PluginTrackerList (these are Screenshots):
