Plugin Snarf

Use this wiki plugin to include the body (HTML) text at the URL given in the `url` argument. It is similar to Integrator.

**Parameters**

*Introduced in Tiki 1. Required parameters are in bold.*

*Go to the source code*

*Preferences required: wikiplugin_snarf*

Arbitrary `regex` replacement can be done on this content using `regex` and `regexres`, which are used as the first and second arguments to `preg_replace` PHP function, respectively, after pulling out just the
<body>

Examples

```{SNARF
(url="http://www.livejournal.com/users/rlpowell/2418.html" regex="/.*<!-- Content -->.*<$td>(.*)<$/td>.*<$div>(.*)<hr./*?<!-- \Content -->.*/s
regexres="<p>$1</p>$2")[http://www.livejournal.com/users/rlpowell/2418.html]
{SNARF}
```

To include the content of a page of another Tiki installation you can use the following syntax:

```{snarf url="http://my.foo.bar/tiki-index_raw.php?page=ExamplePage" wrap="1" ishtml="1" cache="20"}
```

Include Tiki.org Footer Page

```{snarf url="https://tiki.org/tiki-index_raw.php?page=Shared_t_o_footer&clean" ishtml=1}
```

**Produces:**

(currently output is "broken" in Tiki 20.x on this site )

Shared_t_o_footer
