Bytecode Cache Tab

Overview
Use this tab to configure bytecoding caching.

To Access
From the Performance Admin Panel page, click the Performance tab.

Note
Using a bytecode cache is highly recommended for production environments - Ex.: OPcache, APC or XCache.

OPcache: "This extension is bundled with PHP 5.5.0 and later, and is » available in PECL for PHP versions 5.2, 5.3 and 5.4."
