Changes Wizard

Starting in Tiki12.2, this Wizard will guide you through the most common new settings and information in order to upgrade your site:

- Use it if you are upgrading from previous versions of Tiki, specially if you come from the previous Long Term Support (LTS) version.
- Some of these settings are also available through the Admin Wizard, and all of them are available through Control Panels.
- But this wizard will let you learn about them as well as enable/disable them easily according to your needs and interests for your site.
It was first named as "Upgrade Wizard", and later, renamed to "Changes Wizard", to prevent confusion from users expecting it help them upgrade the software from one version to another. It is meant to display "what is new" in this tiki version, and display where possible the preferences and options from those new features for the
tiki site admin.
