

Editorial Board Meeting 2010 05

Last meeting: [Editorial Board Meeting 2009 07](#) | Next meeting: Editorial Board Meeting 2010 08

Motions Passed Last Meeting

Motions Defeated Last Meeting

1. Motions Carried Over

MLP hasn't carried any forward since he was away for a while.

2. New Motions

2.1. New Motion: About Profiles Docs

Motion:

Only site admin (and there is no end user function for profiles?) docs on how to install profiles should be maintained on doc.two. All other questions are referred to [Profiles Documentation](#)

Encouraging Profiles: certain docs like [Initial Configuration](#) should be updated to encourage people to use profiles instead as a means for initial setup.

Discussion:

Profiles documentation has been growing on profiles.tiki. Should we port it to doc.two and possible shut down documentation efforts there? - MLP

IMHO doc.tw.o should stay documentation for end users and admins, not for profile developers. So +1 for only "how to use" the feature to put here, otherwise keep it there. — luci

MLP: So profiles are listed as a "developer feature" they can have their own docs section on profiles. This makes sense to me. Docs then needs to maintain info on how to access and install profiles - not how to make them. We just need a clear line as to what gets doc'd where.

(changing the proposal and resetting the counter)

2.2. Remove Yellow Warning Label

Motion: The yellow warning label about using tiki5 is very ugly and doesn't really help anybody. Lets get rid of it. (across all tiki sites?)

Discussion:

- as tiki5 is now more stable, we should remove these labels ASAP.
