

Email folders Tracker Field

Emails stored as part of the Tiki database, like any other content (files, wiki pages, events, blog posts, etc.)

Email Folder is a new addition to the [Tracker Field Types](#), introduced in [Tiki23](#), being able to hold a list of emails in flat format or IMAP folder-like structured support for Inbox/Sent/Trash folders.

Emails are currently moved to tracker items via the Webmail interface in Tiki (Cypht web interface). Cypht is used to display Tiki-stored messages and handle all relevant actions - read, reply, forward, copy, move, delete. Message can be moved to another tracker item or to an IMAP folder.

1. Configuration

To configure the email folders tracker field, do the following: First of all you have to create a tracker. To create a tracker, proceed as follows:

1.1. Creation and configuration of the Tracker

1.1.1. Check the activation of the Trackers feature

If the Tracker tab exists in the system menu go to the next point.

Click to expand

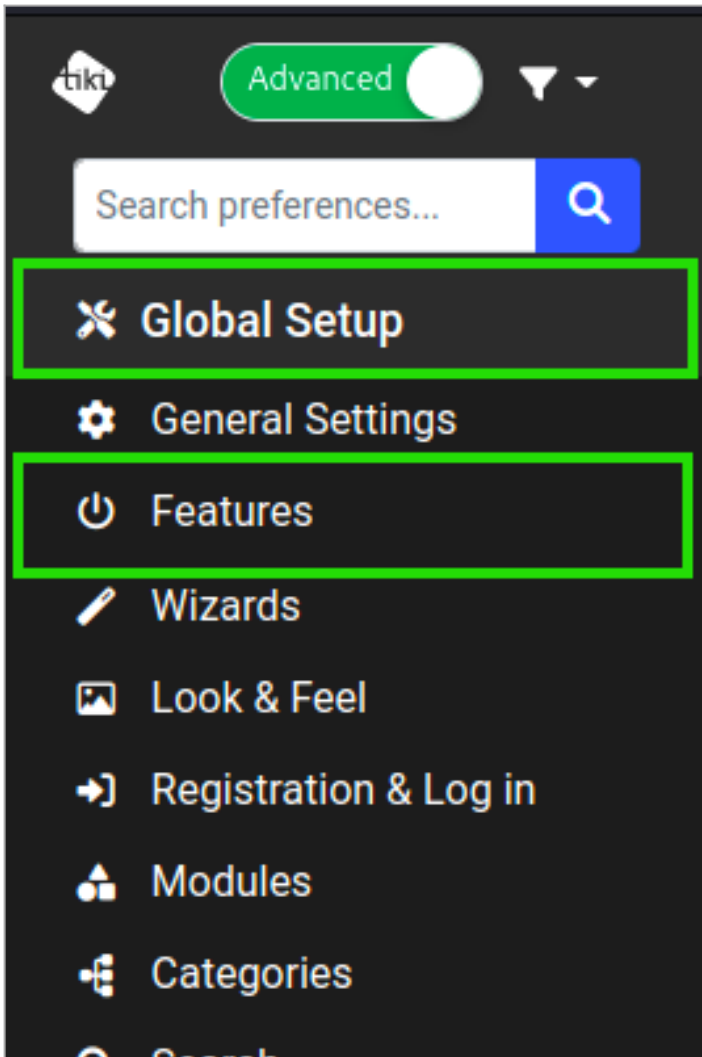

Otherwise if the Tracker tab does not exist, so the feature is not yet activated, you can activate it by following the following steps :

- Settings -> Control Panels

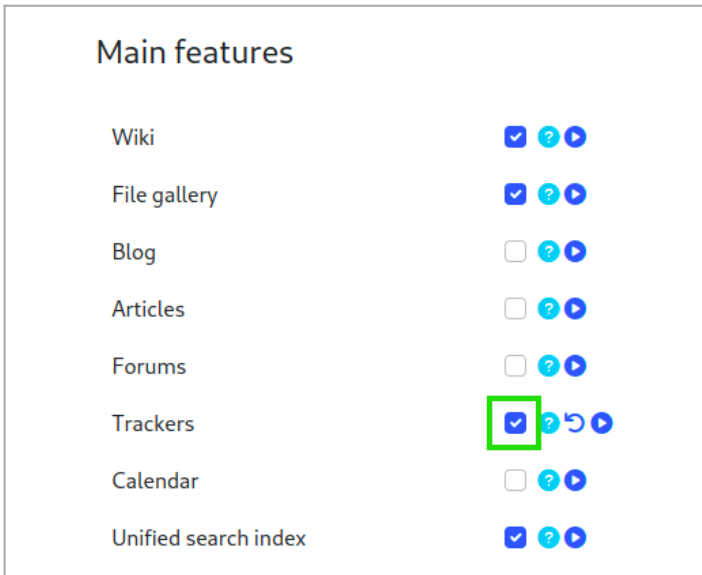

Click to expand

- Global Setup -> Features

Click to expand

- In the Main features section, check the Trackers box

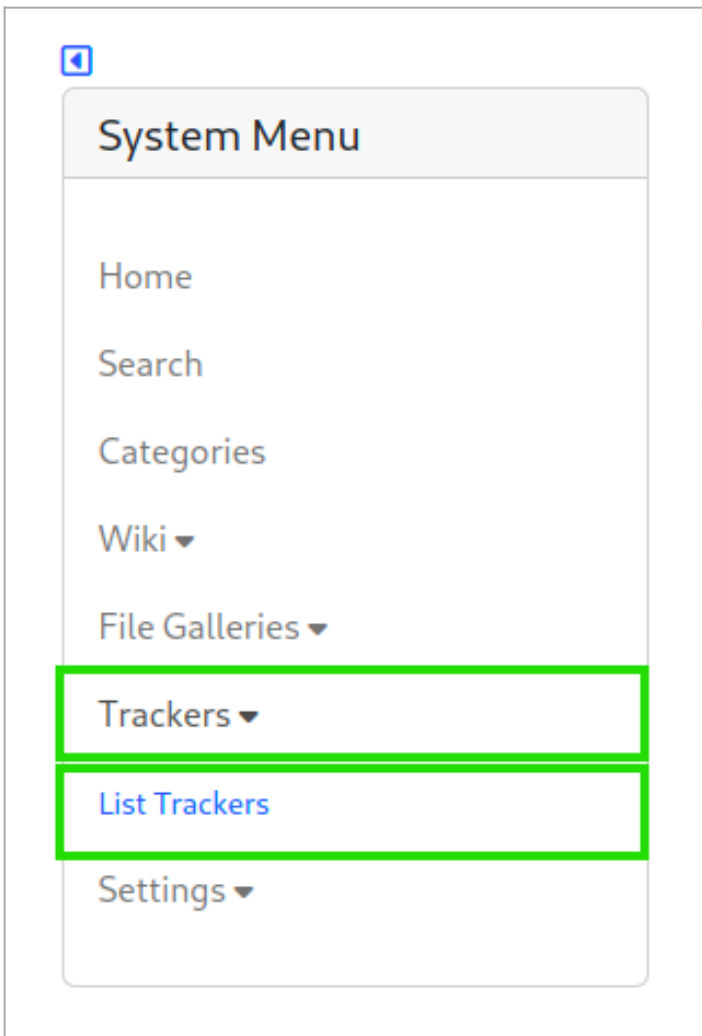

Click to expand

1.1.2. Create a Tracker

To create a Tracker click on:

- Trackers -> List Trackers

Click to expand

- Create

Click to expand

- Enter the name of the Tracker

Create Tracker ✕

Options for Email Folder

Validation

Permissions

Advanced

Close Save

Click to expand

- In the Gallery ID field, select the File Gallery.

It is better to have a dedicated File Gallery for Email. For this example I have a Folder called "Emails", so let's select the option File Galleries > Emails

Options for Email Folder

Associate email messages with tracker items.

Gallery ID

File Galleries > Emails

File gallery to upload new emails into.

Use Folders

No

Use separate folders like Inbox, Sent, Trash, Archive.

Compose Page

Name of the wiki page where compose button will direct to. Leave empty for default Webmail page.

Exclude data and changes from email notifications

No

Data and changes to this field are not included in email notifications.

Click to expand

- In the field Use Folders select Yes, other fields are added below for the configuration of the names of the folders. You can leave it like this

Options for Email Folder

Associate email messages with tracker items.

Gallery ID

File Galleries > Emails

File gallery to upload new emails into.

Use Folders

No

Use separate folders like Inbox, Sent, Trash, Archive.

Compose Page

Name of the wiki page where compose button will direct to. Leave empty for default Webmail page.

Exclude data and changes from email notifications

No

Data and changes to this field are not included in email notifications.

Click to expand

- And finally Validate by pressing Save
