

Select2 has replaced Chosen in [Tiki23](#)

Improve Tracker Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

Enable the feature

You can enable the feature in:

Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu

The screenshot shows the 'Interface' tab in the Tiki23 admin panel. It contains several sections for enabling features:

- Ajax:** Includes 'Ajax' and 'Ajax auto-save', both checked.
- jQuery plugins and add-ons:** Includes 'Autocomplete', 'Superfish', 'jQuery Media', 'Reflection', 'Tooltips', 'jQuery UI', and 'Validation', all checked.
- jQuery UI Theme:** Set to 'flick'.
- Experimental:** A section containing 'jQuery Infinite Carousel' (unchecked), 'jQuery Sortable Tables' (checked), 'jQuery-ui Chosen Menu' (checked and highlighted with a red box), and 'jQuery-ui Select Menu' (unchecked).
- Mobile:** Includes 'Mobile Access' (unchecked) with a warning message: 'You need to set Perspectives'.

An 'Apply' button is located at the bottom of the form.

Remember that you need to have your "Preference Filters" in the admin panel with the "Advanced" and "Experimental" options enabled in order to see this feature checkbox.

Features

The screenshot shows the 'Preference Filters' section with the following options:

- ☒ Basic
- ☒ Advanced
- ☒ Experimental
- ☐ Unavailable

A 'Set as my default' button is located to the right of the filters.

Drop downs

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

Subject *

Subject or short summary of the issue (max 255 characters)

Importance

10: Popular 1: Edge case or rare

Easy to solve?

10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours of work

Feature

Category *

Category of the issue

Tiki Version ☐ 10.x ☐ 11.x

Click to expand

Multiple selection

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

Easy to solve?

10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work

Feature

Category *

Category of the issue

Tiki Version ☐ 8.x ☐ 9.x

Click to expand

Filtering displayed options by typed text

Additionally, you can also filter the values displayed in the dropdown so that only those matching your typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a *.tiki.org site).

Easy to solve?

5

10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work
