A PHP route.php file now replaces the rewrite rules from _htaccess http://sourceforge.net/p/tikiwiki/code/44661/ for Tiki11 so the instructions below can be vastly simplified. We are looking for a volunteer to do this and to commit a default to the main code base.

## Clean URLs with Lighttpd

Draft rewrite rules for Tiki on lighttpd. This is a starting point for testing and further development of the rules. Please adapt to your site and test thoroughly that they work and are complete; and use at your own risk.

### Add to lighttpd configuration file

```
$HTTP["host"] = "(www.)?example.com" {
    url.rewrite-once += (
