Mod join box

**join box** is a simple "join now"..

Install

See Mods Admin for instructions on how to install a Mod.

Usage

Once installed, you will see it under "Admin > Modules" (tiki-admin_modules.php):

You can assign a this Module to a lateral column (See Module Admin page if needed), or you can include it within a wiki page, using the PluginModule.

The assigned module looks like this:

```
<table>
<thead>
<tr>
<th>Join</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sign up for a free online membership to download tools, receive monthly developer news, or purchase support services and products.</td>
</tr>
<tr>
<td>If you have an existing account, please log in above.</td>
</tr>
<tr>
<td>register</td>
</tr>
</tbody>
</table>
```

Also, links to frequently used icons are included below and the attached photos here are used throughout the module and plugin pages through use of PluginAttach.

Since Tiki6 headings from includes are not showing up correctly in the maketoc plugin, so use the below as a workaround:

```
startinclude1a
```

See these pages for information that applies for all modules:

- **Module**--Overall introduction and overview
- **Module Admin**--Introduction to the module admin pages for site-wide and individual module settings
  - **Assigning Modules**--How to select a module to configure it
  - **Module Settings Interface**--Interface for configuring individual module settings
  - **Module Settings Parameters**--Explanation of standard parameter settings for modules
  - **Creating Custom Modules**--How to create user modules
- **Index of Modules**--Links to the documentation of individual modules
- **User Modules**--how (if the feature is active) users can choose and place their modules
- **Mods Type Modules**--links to modules that are installed as components

```
stopinclude1a
```
