

Module categories

Display links to categories in a tree

Parameters

Displays links to categories as a tree.

[Go to the source code](#)

Preferences required: feature_categories

Parameters	Accepted Values	Description	Default	Since
selflink	alpha	y n .If y, category links to a page named as the category		
customURL	alpha	Custom URL for link to send you. Use as placeholder for catId or for name. E.g. "ProductBrowse?categ=No value assigned"		
deep	word	Show subcategories objects when accessing a linked category. Possible values: on (default), off.		
hideEmpty	alpha	y n .If y, only categories with child objects will be shown.		
type	any string except for HTML and PHP tags	Object type filter to apply when accessing a linked category. Example values: wiki page, article, faq, blog, image gallery, image, file gallery, tracker, trackerItem, quiz, poll, survey, sheet		
onlyChildren	alpha	y n .If y, only direct child categories will be shown. Default: n		
categId	int	Limits displayed categories to a subtree of categories starting with the category with the given ID. Example value: 11. Default: 0 (don't limit display).		
categParentIds	any string except for HTML and PHP tags	Show only these categories and the immediate child categories of these in the order the parameter specifies. Example values: 3,5,6.		

Example

This code:

```
{MODULE(module=categories) /}
```
