Module
When viewing a wiki page, this Module displays a list of other wiki pages that have at least a given number of tags in common with the page being viewed. The feature Freetags must be activated. This module will be hidden when viewing objects other than wiki pages.

Usage
You will see it listed at Admin > Modules > Assign new module > freetags_morelikethis (drop down) (tiki-admin_modules.php).

You can assign a this Module to a lateral column (See Module Admin page if needed), or you can include it within a wiki page, using the PluginModule. The assigned module looks like the example shown to the right.

Parameter Values Description
rows integer \( \geq 0 \) Controls the max number of matching pages to display

tw\( \geq 2.0 \)

Admin Options
In the Admin:Freetags page (tiki-admin.php?page=freetags), there are two option controls for this module in the "Tag Management" section, shown below.

Parameter Values Description
More Like This algorithm basic, weighted Q: How do these differ? tw\( \geq 2.0 \)

Basic algorithm - min amt of tags in common 1-9 Pages with fewer tags in common are not listed tw\( \geq 2.0 \)

Also, links to frequently used icons are included below and the attached photos here are used throughout
the module and plugin pages through use of PluginAttach.

Since Tiki6 headings from includes are not showing up correctly in the maketoc plugin, so use the below as a workaround:

See these pages for information that applies for all modules:

- **Module**--Overall introduction and overview
- **Module Admin**--Introduction to the module admin pages for site-wide and individual module settings
  - Assigning Modules--How to select a module to configure it
  - Module Settings Interface--Interface for configuring individual module settings
  - Module Settings Parameters--Explanation of standard parameter settings for modules
  - Creating Custom Modules--How to create user modules
- **Index of Modules**--Links to the documentation of individual modules
- **User Modules**--how (if the feature is active) users can choose and place their modules
- **Mods Type Modules**--links to modules that are installed as components
