Module "menupage"

This module will display the content of any wiki page as a menu in the left or right column or in any other place that a module can be located.

- This type of menu is used as the upper left menu in dev.tiki.org for example.

You can also use this module in the center (main) column.

- See Happy Scroll theme for details.

Usage

On the page Admin > Modules (tiki-admin_modules.php)

- Assign a new module
- Choose the module "menupage" from the drop-down list.

Parameters

- Add the parameter pagemenu=Name Of Wiki Page.

The module will have the same title as the wiki page.

You can assign this "menupage" to any module zone (See Module Admin page if needed, or you can include it within a wiki page, using the PluginModule.

Example

Imagine you have a page called ))SideMenu((, with this content:

```markdown
(:arrow:) [tiki-index.php|Home Page]
(:arrow:) [tiki-lastchanges.php|Last changes]
(:arrow:) [tiki-view_forum.php?forumId=1|Forum Wiki-translation]
''[tiki-editpage.php?page=SideMenu|edit]''
```

The wiki page itself looks like this:
Then, the module **menupage**, like all modules, can be assigned to a group of users.

The assigned module looks like this:

![Welcome to Wiki-Translation](http://www.wiki-translation.com)

Welcome to wiki-translation, a community dedicated to discussing the impact of the wiki phenomenon on the world of translation. This is a place where people interested in translation using a massively collaborative wiki paradigm, can exchange best practices and tools, and discuss how to improve them.

**Information about this community**

- FAQ: Answers to Frequently Asked Questions about this community, including how to join, our editing policy and the list of People interested.

You can see this example live in [http://www.wiki-translation.com](http://www.wiki-translation.com)

For more advanced menus, see "Menu" feature.
