Module permissions

New in Tiki19 (and probably better in Tiki20), this module lists the permissions for current object.

It help site admins know which group has which permission on the current object, and how (ex.: object permissions vs category permissions vs global permissions)

Usage

```
{MODULE(module=permissions)}. {MODULE}
```

Parameters

As of 2019-06-21, the module has no parameters. @developers: please test and add parameters as you see fit

```
Parameters

no parameters
```

Example

This is a screenshot of the module in use at https://dev.tiki.org/ (visible to logged in users only)
Permissions

Permissions applied from:
*global* level
