Module register

Display the registration fields in a module. It's called "New User Registration".

You need to have enabled the option to allow the users to register, in order for the module to work.

**Important:**

- Remember to set this module to display **only** for anonymous users, and not registered. If shown to registered, Tiki will attempt to redirect the site to the homepage, and you add that in a side module, Tiki will attempt to make some redirection loop that you should avoid.
- For the previous setting to work, remember to set:
  - Admin home > Module > **Hide anonymous-only modules from registered users**

**Parameters**

*Preferences required: allowRegister*

<table>
<thead>
<tr>
<th>Parameters</th>
</tr>
</thead>
<tbody>
<tr>
<td>no parameters</td>
</tr>
</tbody>
</table>

**Example**

Example of the module register displayed for anonymous users:
