

# Shopping Cart Order Item Profile

The pagename on your Tiki for this profile cannot contain spaces

This is used for the advanced [Shopping Cart](#) feature: Record orders in trackers.

To use it on your Tiki, you will need to change:

- the tracker ID
- the field IDs
- \$OrderProfile:new\_order to \$WhateverTheOrderProfilePagenameIs:new\_order

Make sure that proper [Permissions](#) are set on the page so that it does not get edited by non-admins.

## YAML

```
objects: - type: tracker_item ref: new_order_item data: tracker: 5 status: pending values: - [ 20, $OrderProfile:new_order ] - [ 21, $profilerequest:product$0$ ] - [ 22, $profilerequest:price$0.00$ ] - [ 23, $profilerequest:quantity$0$ ] - [ 40, $profilerequest:user$admin$ ] - [ 52, $profilerequest:eventcode$0$ ] - [ 158, $profilerequest:eventstart$0$ ] - [ 159, $profilerequest:eventend$0$ ] - [ 216, $profilerequest:price$0.00$ ] - [ 227, $profilerequest:inputedprice$0.00$ ] - [ 228, $profilerequest:parentcode$0$ ]
```
