Shopping Cart Order Profile

The pagename on your Tiki for this profile cannot contain spaces

This is used for the advanced Shopping Cart feature: Record orders in trackers.

To use it on your Tiki, you will need to change:

- the tracker ID
- the field IDs

Make sure that proper Permissions are set on the page so that it does not get edited by non-admins.

YAML

```yaml
objects:
  -
    type: tracker_item
    ref: new_order
    data:
      tracker: 4
      status: pending
    values:
      - [ 15, $profilerequest:user$admin$ ]
      - [ 16, $profilerequest:time$315532800$ ]
      - [ 17, $profilerequest:total$0.00$ ]
      - [ 18, $profilerequest:invoice$0$ ]
```
