Major Slowdown tab

Overview

Use this tab to configure the Tiki options tha may affect your overall performance.

To Access

From the Performance Admin Panel page, click the **Major Slow Down** tab.

Note

The features on this tab have been reported to lower overall performance, especially in high-volume sites.

Option	Description	Default
Plugin ShareThis	Add a ShareThis button	Disabled
Log SQL	All SQL queries will be registered in the database in the tiki_sql_query_logs table. ⚠ *Do not enable this feature all the time. It can be very resource intensive and will impact performance.*	Disabled
Log mail in Tiki logs	A line of type mail will be included in the System Log with the destination address and subject of each email sent. ⚠ *May impact performance*	Disabled
Smarty template usage indicator	Add HTML comment at start and end of each Smarty template (.tpl file) ✳ *Clear the Tiki system cache for this change to take effect.* 👆 *Use only for development, not in production at a live site, because these warnings are added to emails as well, and are visible to users in the page source.* ⚠ *May impact performance*	Disabled
Show category object count	Show object count when browsing categories, complying with search and type filters ⚠ *Can slow the loading of the categories page on large sites.*	Enabled
Clear cache upon category change	A cache is used to avoid having to fetch all categories from the database every time; this clears the cache when an object is categorized to keep the count up to date. ⚠ *Can slow saving objects on sites with a lot of categories. You may need to manually clear caches to update category object counts.*	Enabled
Log bytes changes (+/-) in action logs	⚠ *May impact performance*	Disabled
Parse search results	When enabled search results are parsed so content formatting is visible in the search results ⚠ *May impact performance*	Enabled
Custom blog headings	⚠ *Using custom blog headings will use significantly more server resources. Unless you need per-blog templates, you should customize the template file instead.*	Disabled

Option	Description	Default
PHP Error reporting level	Level of errors to be reported. Errors can be seen in a collapsible box at the bottom of the page, if any exist. ≣ No error reporting | Report all PHP errors except strict | Report all PHP errors | Report all PHP errors except notices | According to the PHP configuration	Report all PHP errors excep...
Enable Typography Features	Features to replace normal characters with typographic equivalents	Disabled
