Plugin A Link

This wiki plugin, available since Tiki1, creates a link to an anchor in a wiki page. Use in conjunction with PluginAname, which creates the anchor, or link to a wiki heading.

Parameters

Introduced in Tiki 1. Required parameters are in **bold**.

Go to the source code

Preferences required: wikiplugin_alink

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
<th>Default</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td>(body of plugin)</td>
<td></td>
<td>Anchor link label.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><code>aname</code></td>
<td></td>
<td>The anchor name as defined in the Aname plugin.</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td><code>pagename</code></td>
<td>pagename</td>
<td>The name of the wiki page containing the anchor. If empty, the anchor name will be searched for on the wiki page where the plugin is used.</td>
<td>1</td>
<td></td>
</tr>
</tbody>
</table>

Example

Aname Plugin Usage

```plaintext
{ANAME()}

anchorname <-- put the name of the anchor here. Use this same name for the aname= parameter in the Plugin Alink (see just below).

{ANAME}

ANAME example: {ANAME}anchorname{ANAME}
```

Alink Plugin Usage

```plaintext
{ALINK(

aname=anchorname <-- put here the name of the anchor you created using the Plugin Aname!

)

link text <-- put here the text to appear as the link.

{ALINK}

ALINK example: {ALINK(aname=anchorname)}link text{ALINK}
```
Demonstration

To jump down to the anchor at the bottom of the page click HERE. <-- Here is where I put the \texttt{ALINK} plugin in this page.

Here is a second link to the same anchor at the bottom of the page. Again, I used the \texttt{ALINK} plugin.
The anchor is here. <-- I put the [ANAME] plugin at the beginning of this line. Now you can click HERE to jump to the anchor I put at the top of the page (you can't see where that one is unless you look into the page editor 😊)
