Example

Let's say you had a page with the lyrics to the song *Hands on the Wheel*, and it is categorized by the singer and the composer, and that all pages with song lyrics on the site are categorized as *Songs*. Here's what the CATPATH plugin would produce on that page:

*This code,*

```markdown
{catpath}
```

*Would produce:*

*Songs > Singer > Willie Nelson
Songs > Composer > Bill Callery*
