

# Plugin Fancy List

Use this [wiki plugin](#), introduced in [Tiki3](#), to produce a fancy looking numbered list.

## Parameters

Create a formatted numbered list

*Introduced in Tiki 3.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_fancylist`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		One item per line starting with anything followed by ").		
<code>class</code>	text	CSS class for the fancylist		3.0
<code>div</code>	(blank) 1 0	Use the HTML div tag instead of the HTML ordered list tag (ol)		3.0

## Example

In this example, additional formatting is applied to the items in the list: the double single quotes ( " ) to produce italics, and the two underscores before and after the words ( \_\_ ) to make the font bold. See [Wiki Syntax](#) for more information on text formatting.

*This code,*

```
{FANCYLIST()} "__Antiquity__" "__Middle Ages__" "__Renaissance__" "__Age of Enlightenment__" "__Romantic Era__"
"__20th Century__" "__Present Day__" {FANCYLIST}
```

*Would produce:*

1. ***Antiquity***
2. ***Middle Ages***
3. ***Renaissance***
4. ***Age of Enlightenment***
5. ***Romantic Era***
6. ***20th Century***
7. ***Present Day***
