Plugin Mail

*Introduced in Tiki5*

This wiki plugin allows users to directly mail other users or groups. This plugin can be placed in a wiki page, but functions like the message system in MyAccount.

**Parameters**

*Introduced in Tiki 3. Required parameters are in **bold**.*

Send Mail

Choose between a drop down of user logins, user real names, or groups names, or direct input of emails. The groups list can be limited to the groups that include a specific group. The mail will be sent as a unique email from the webserver but the email address of the sender will appear in the “from:” address.
