**Example**

This code:

```
{memberpayment group="association" price="50"}
```

Would produce:

Membership to association for 365 days at 50 USD

Users: admin  (separated by |)

Periods: 1  [Continue]
Clicking on the continue button:
Takes the user to a screen where the payment can be made. Here's an example with Paypal used as the payment method (set in the Payment admin panel):

Manually completing payment information:
An admin will be able to fill in the payment information in case of a 'manual' payment. Here's an example of what the admin would see for an unpaid payment:
