Plugin RSS

Use this wiki plugin to display items received from an external RSS feed that has been set up in the external feed feature (at [tiki-admin_rssmodules.php]). See External Feeds on how to set up Tiki to receive external feeds, which will need to be done first before using this plugin. For outgoing RSS feeds, see Feeds.

Parameters

Introduced in Tiki 1. Required parameters are in **bold**.

Go to the source code

Preferences required: wikiplugin_rss

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
<th>Default</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td>id</td>
<td>int</td>

<td>showtitle</td>
<td>(blank)</td>
<td>Show the title of the feed (shown by default)</td>
<td>1</td>
<td>6.0</td>
</tr>
<tr>
<td>ticker</td>
<td>(blank)</td>
<td>Turn static feed display into ticker news like</td>
<td>1</td>
<td>10.1</td>
</tr>
</tbody>
</table>

Usage notes

- `feedId` is the id of the feed set up at Settings > External Feeds (or [tiki-admin_rssmodules.php]), `max` is the number of shown entries, `date` and `author` (optional) are added if set to `1`, and hidden if set to `0`, `desc` is a short description of the current rss item (optional).
You can also combine feeds by indicating 1:2, or 1:2:3 to add feeds together. Note, however, that if you are combining feeds, "show publish date" must be checked in the Feeds module settings, in order to allow this plugin to sort the combined feeds.

**Examples**

Let's say you wish to display the list of last 3 items of a feed with the Id of 1 inside a Wiki page. Simply include this in your page, with date, but no author:

```
{rss id="1" max="3" date="1" author="0" desc="1"}
```

*On this site, this would produce:*

**tiki.org articles**

- **Tiki Project Welcomes New Administrators**  (Fri 08 Apr, 2022)
  Tiki Wiki CMS Groupware is an organic self-governing project that does things "the wiki way" and, in this spirit, when it's time to find people to join the group of project administrators, we draw from the community or active participants who can contribute time and effort to help with the guidance and direction of the project. At this time, the Admin Group of the Tiki Software Community Association is pleased to announce the addition of two new members, Habiba Shahbaz and Roberto Kirschbaum. Habiba is bringing her unique skillset to keep the wheels of project administration turning smoothly, and Roberto has been actively contributing his coding skills, managing releases, and participating in community meetings. We are very pleased to make this announcement, and thanks again to the new admins for joining as we look forward to a great 2022. Another administration change to announce is that Bilal Siddiq has resigned from the administrators group to devote more time to his other pursuits. We thank Bilal for his time in the group and wish him the best. About the new members . . . .

- **Tiki 24 LTS Released**  (Tue 15 Mar, 2022)
  After several months of hard work, the latest long-term support version, Tiki 24, has been released. This version of Tiki Wiki CMS Groupware, which benefited from EvoluData's junior developer sponsorship program for a more coordinated approach to bug fixing, includes significant new features and numerous bug fixes and security enhancements. We are pleased to make Tiki 24.0 available at this time. Regular feature support will be provided for Tiki 24 via point releases until at least March 2024, and security updates until the end of the version's service life in March 2027. See the timeline on Versions.

- **TikiRoundtable Meeting this Sunday, January 23, 2022**  (Fri 21 Jan, 2022)
  We have a TikiRoundtable meeting this Sunday, 23 January 2022 15:00 GMT Join our last of the year Tiki Roundtable meeting at : https://live.tiki.org/

*On this site, this would produce:*

```
{rss id="1"max="3" date="1" author="0" desc="1" ticker="1" desclen="50"}
```

Now you want the same using a "Ticker like" effect:

Smarty Feeds Function

You can also include a feed in a wiki page by using the Feeds Smarty function (lib\smarty_tiki\function.rss.php). Its usage is:

```{rss id="5" max="10"}```

Parameters for Smarty Function

<table>
<thead>
<tr>
<th>id</th>
<th>ID</th>
<th>mandatory</th>
<th>ID of the rss</th>
</tr>
</thead>
<tbody>
<tr>
<td>max</td>
<td>number</td>
<td>optional</td>
<td>max number of objects to show</td>
</tr>
<tr>
<td>skip</td>
<td>numbers separated by comma</td>
<td>optional</td>
<td>the objects to skip. Ex: 1,3 will skip the first object and the third one</td>
</tr>
</tbody>
</table>
