

This experimental feature was removed before [Tiki19](#) because

- it was not really working
- no one was working to improve it
- and it duplicated existing functionality
  - [PluginTrackerList](#) for simple reports
  - [PluginList](#) for advanced reports

Details: [https://tiki.org/forumthread67333-Let's-remove-unmaintained-PluginReport](https://tiki.org/forumthread67333-Let-s-remove-unmaintained-PluginReport)

# Plugin Report

Introduced in [Tiki9](#), use this [wiki plugin](#) to build a [Report](#), store it in a wiki page, and edit it from the page itself.

## Parameters

Tiki Doc From Code error: reportplugin not found

## Examples

Example of code to use for a report, generated from the edit report interface:

The screenshot shows the 'Report Builder' interface on a Tiki website. The 'Report Type' is set to 'Tracker' and the 'Tracker' is 'Time sheet - 4'. The 'Join Tracker' button is visible. On the left, there are sections for 'Start', 'End', 'Item Id', 'Search' (set to 'Summary - 12'), 'Status' (checkboxes for o, p, c), and 'Fields' (checkboxes for Summary - 12, Associated project - 13, Description - 14, Amount of time spent - 15, and Done by - 16). A modal window titled 'Wiki Data Output For REPORT Plugin' displays the generated wiki code:

```
(REPORT())
type : Tracker
tracker_value : 4
tracker_search_0_value : 12
tracker_status_0_value : o
tracker_status_1_value : p
tracker_status_2_value : c
tracker_fields_0_value : 12
tracker_fields_1_value : 13
tracker_fields_2_value : 14
tracker_fields_3_value : 15
tracker_fields_4_value : 16
{REPORT}
```

At the bottom, there are buttons for 'Preview', 'Wiki Data' (which is selected), and 'Export As CSV'. Below these buttons is a table with columns A, B, C, D, and E. The data rows are:

A	B	C	D	E
1 Summary - 12	Associated project ...	Description - 14	Amount of time sp...	Done by - 16
2 Watch TV		Taking it easy 	5	
3
